

About me

- E3 DTP September 2015 – March 2020
- Used satellite data and climate model output to interpret variability in the Earth's radiation budget (Paul Palmer, Helen Brindley)
- Now a postdoc at the University of St Andrews, working on cloud feedbacks and circulation changes

About me

- E3 DTP September 2015 – March 2020
- Used satellite data and climate model output to interpret variability in the Earth's radiation budget (Paul Palmer, Helen Brindley)
- Now a postdoc at the University of St Andrews, working on cloud feedbacks and circulation changes

- 1. During my PhD (years 1-3)**
- 2. The final push (applying for jobs)**
- 3. How did that work out for me?**

What did I do during my PhD to prepare me for looking for postdocs?

- Focus on **publications** and presenting at **conferences**
 - Publications: familiar with the writing/review process etc
 - Presentations: engaging with the community; practice

What did I do during my PhD to prepare me for looking for postdocs?

- Focus on **publications** and presenting at **conferences**
 - Publications: familiar with the writing/review process etc
 - Presentations: engaging with the community; practice
- Made use of one of the **DTP schemes**:
 - Arranged to be a **visiting student** at ETH Zurich Sep-Dec 2017, the DTP provided funding for me to travel to/from the University from where I was staying
 - I did this through the **E3 Overseas Research Visit and Conference Funds**
 - Introduction to writing a funding application/costing etc

What did I do during my PhD to prepare me for looking for postdocs?

 - Publications: familiar with the writing/review process etc
 - Presentations: engaging with the community; practice
- Made use of one of the **DTP schemes**:
 - Arranged to be a **visiting student** at ETH Zurich Sep-Dec 2017, the DTP provided funding for me to travel to/from the University from where I was staying
 - I did this through the **E3 Overseas Research Visit and Conference Funds**
 - Introduction to writing a funding application/costing etc
- Generally, tried to **engage** and **attend training courses**
 - Took part in Edinburgh International Science Festival, other outreach events, T&D
 - Training courses through NERC and IAD

What did I do in the final months of PhD when I was applying for jobs?

- Started **early** (when I was writing up)
 - I made a list of what was important to me in a job
 - I made a list of what I thought my skills were (aside from scientific specialty)

What did I do in the final months of PhD when I was applying for jobs?

- Started **early** (when I was writing up)
 - I made a list of what was important to me in a job
 - I made a list of what I thought my skills were (aside from scientific specialty)
- Found a database of appropriate **job listings** (Met Jobs) and checked it regularly

What did I do in the final months of PhD when I was applying for jobs?

- Started **early** (when I was writing up)
 - I made a list of what was important to me in a job
 - I made a list of what I thought my skills were (aside from scientific specialty)
- Found a database of appropriate **job listings** (Met Jobs) and checked it regularly
- **I told people** I was looking for a postdoc

 - I made a list of what I thought my skills were (aside from scientific specialty)
- Found a database of appropriate **job listings** (Met Jobs) and checked it regularly
- **I told people** I was looking for a postdoc
- I made use of the **DTP schemes**:
 - I got another month funding to write some of the applications through the **Professional Development Scheme**

How did that go for me?

- I applied for 4 jobs, I got 4 interviews and got the 4th
 - Postdoc in carbon cycling at Uppsala University, Sweden

How did that go for me?

- I applied for 4 jobs, I got 4 interviews and got the 4th
 - Postdoc in carbon cycling at Uppsala University, Sweden
 - ESA Research Fellowship*

* Valuable experience: first time I'd written a research proposal

How did that go for me?

- I applied for 4 jobs, I got 4 interviews and got the 4th
 - Postdoc in carbon cycling at Uppsala University, Sweden
 - ESA Research Fellowship*
 - Postdoc in air quality modelling at CEH**

* Valuable experience: first time I'd written a research proposal

** Offered a different job to the one I applied for
